DETAILED ACTION***Response to Amendment***

In regard to the Double Patenting rejection, further examination of this file indicates that there are two separate sets of claims, the first being the original claims filed 1/14/2004, hereinafter referred to as set A, and a second set filed 10/20/2004 in response to a restriction requirement, hereinafter referred to as set B. Careful comparison of set A and set B reveals two differences: claim 19 has an extra limitation, "a first hard-mask layer on said pad oxide layer;" in set A, which does not appear in set B, and claim 23, which reads "23. The structure of claim 19, wherein said first hard-mask layer is silicon nitride and has a thickness of between about 100 and 500 Angstroms." in set A, but which reads "23. (Original) The structure of claim 19, wherein said first conducting layer is a material selected from the group that includes polysilicon, TiN, WN, MoN, WSiN, TiW, TaN, and Ta." in set B. All of the remaining claims between sets A and B are identical.

The rejection mailed 1/13/2005 refers to set B, hence the double patenting rejection between claims 23 and 24, which are identical in that claim set.

The amendment filed 4/18/2005 amends claim 19 of set B, in that it adds, among other limitations, the limitation "a first hard-mask layer on said pad oxide layer;". In addition, the amendment filed 4/18/2005 makes no change to claim 23, which is from claim set A, and which does not conflict with claim 24.

The net result is that the amendment filed 4/18/2005 resolves the differences between claims 19 and 23 in the two claim sets, as well as makes additional changes to the claims based on the prior art rejection.
